

## PCATP Hosts IFC/World Bank Group for Green Building and Resilience Discussion

On November 12, 2025, at 3:00 p.m., the Pakistan Council of Architects and Town Planners (PCATP) had the honor of hosting a meeting with the IFC/World Bank Group Green Buildings and Building Resilience Index (BRI) Mission at the PCATP Secretariat in Islamabad.

The meeting focused on exploring collaboration opportunities via the Building Resilience Index (BRI) Tool, a globally recognized framework that enables the building sector to assess, enhance, and disclose resilience against natural hazards and climate risks.

Both organizations have agreed to develop a roadmap aimed at building the capacity of PCATP members and promoting awareness of green and resilient building practices across Pakistan.

This partnership is a significant step toward integrating sustainability, resilience, and climate adaptation into Pakistan's architectural and planning sectors.
